Day 1: Arrival to Reykjavik City and Check into the Hotel

Reykjavík may be one of the smallest capital cities in Europe, but it still packs a powerful cultural punch, where visitors can enjoy a multitude of various events and festivals all year round! With a fascinating history rooted in the great Sagas and its unique location within a land of diverse landscapes – all filled to the brim with beautiful nature, Reykjavík manages to combine a terrific blend of hip and wholesome, but without the stress that usually follows a cosmopolitan metropolis. In fact Icelanders are considered to be so easy-going and gregarious, that they've just added a new travel accolade to their growing collection, this time for being the friendliest nation in the world!

Day 1: Dinner at Fish Company

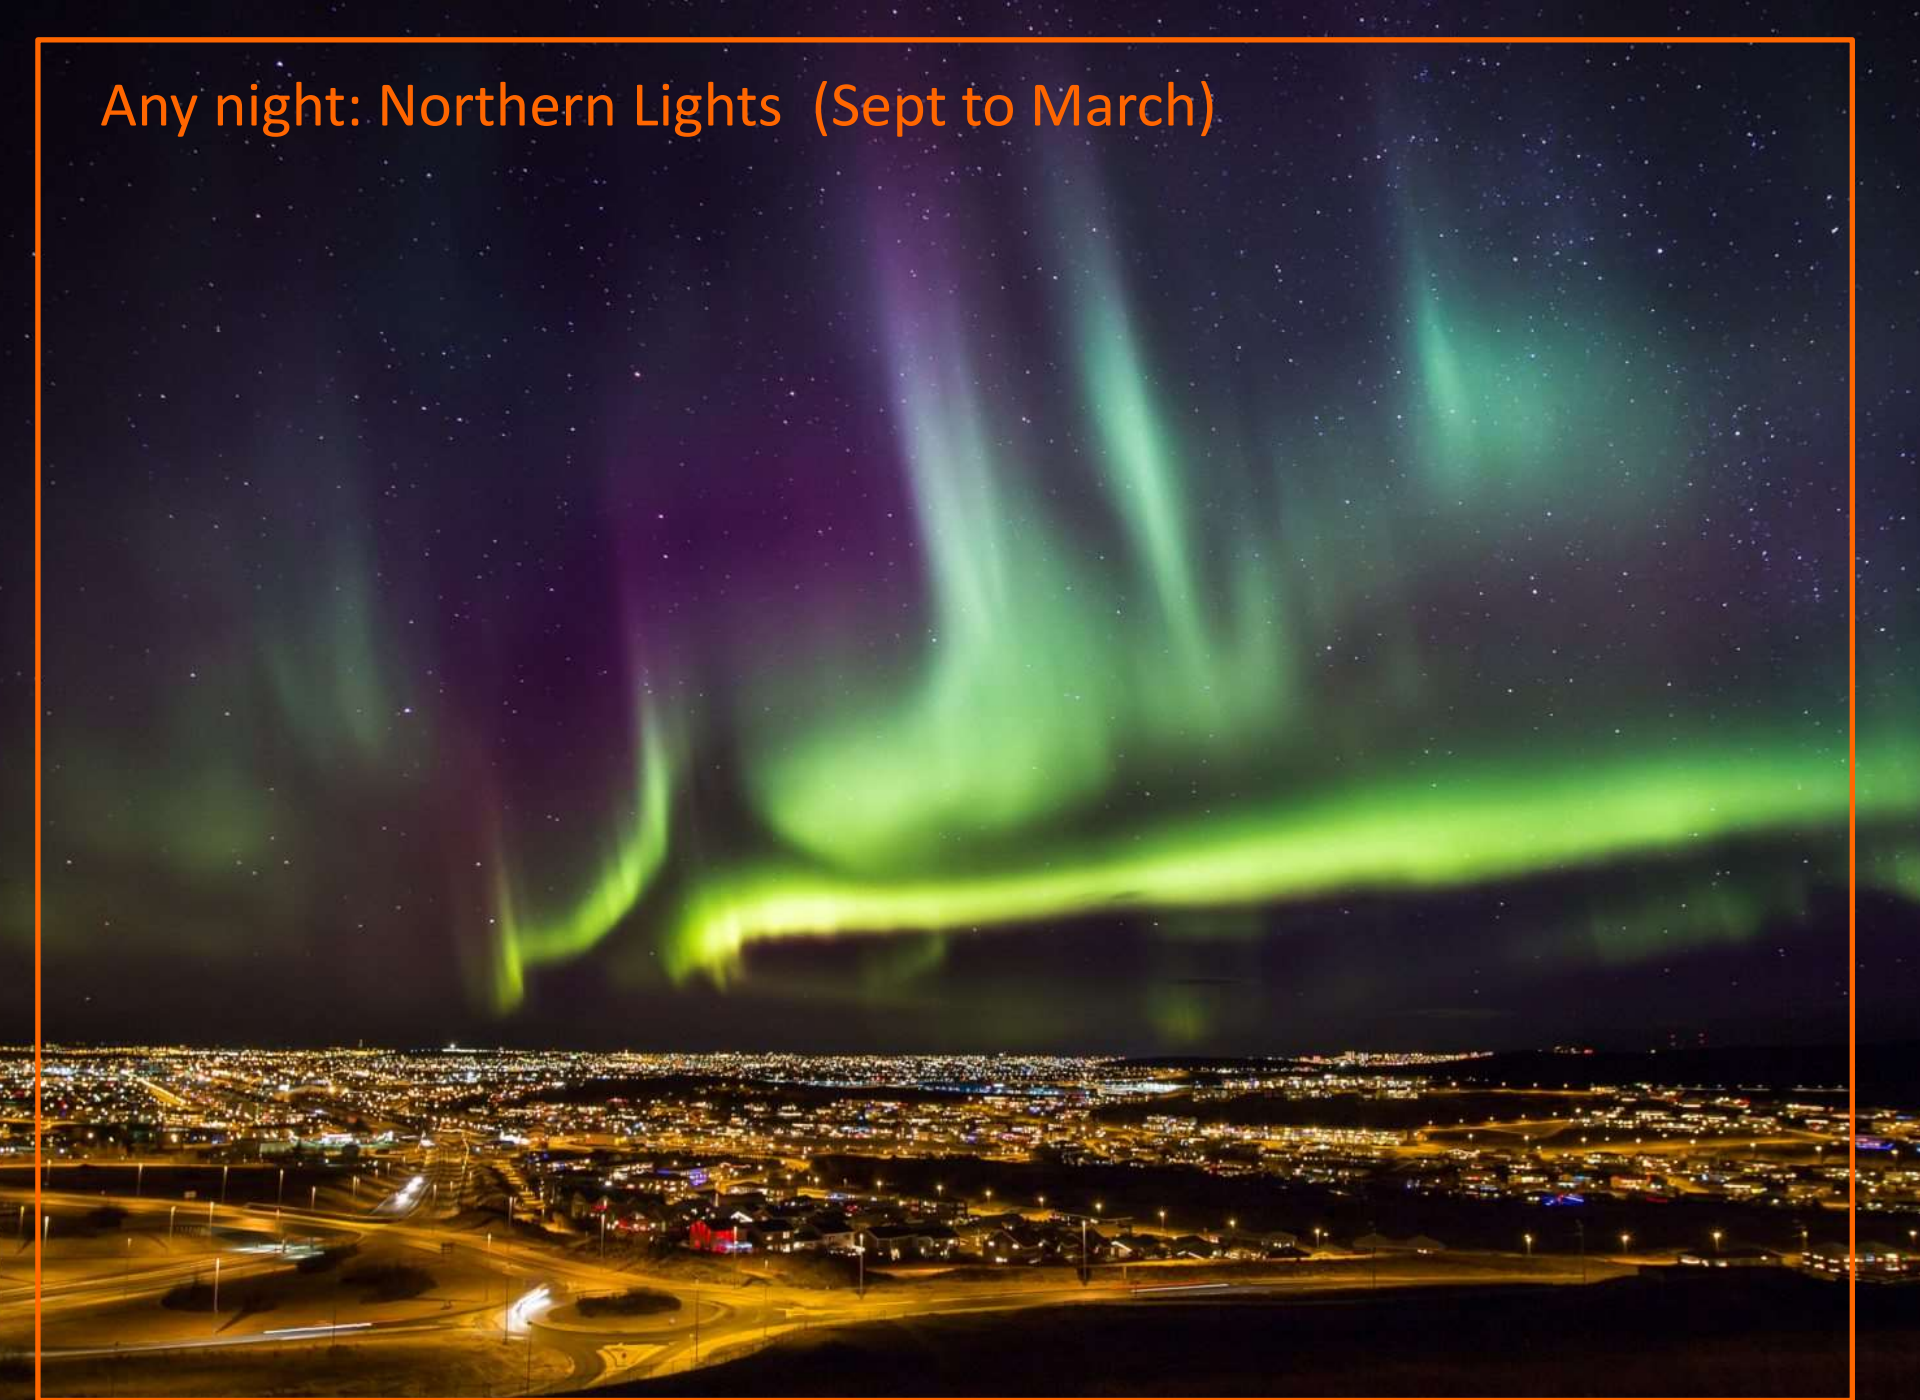

Adventure under a bridge

In the early days of the Fish Company, a satisfied patron set his plate to the side and remarked; “Without fail, all the best adventures take place under a bridge.” We immediately secured his permission to use this as our slogan.

Not only is the menu an adventurous journey around the world, a sense of adventure is also reflected in the surroundings and essence of the venue. The Zimsen building dates back to 1884 and originally stood at Hafnarstræti 21, a few hundred meters east of it's current location. It was extended in 1889, but in 2006 it was uprooted and lovingly renovated before being replanted at Grófartorg in 2008.

Any night: Northern Lights (Sept to March)

Day 2: Lets have fun in Iceland !

Day 2: Buggy Cars (half day)

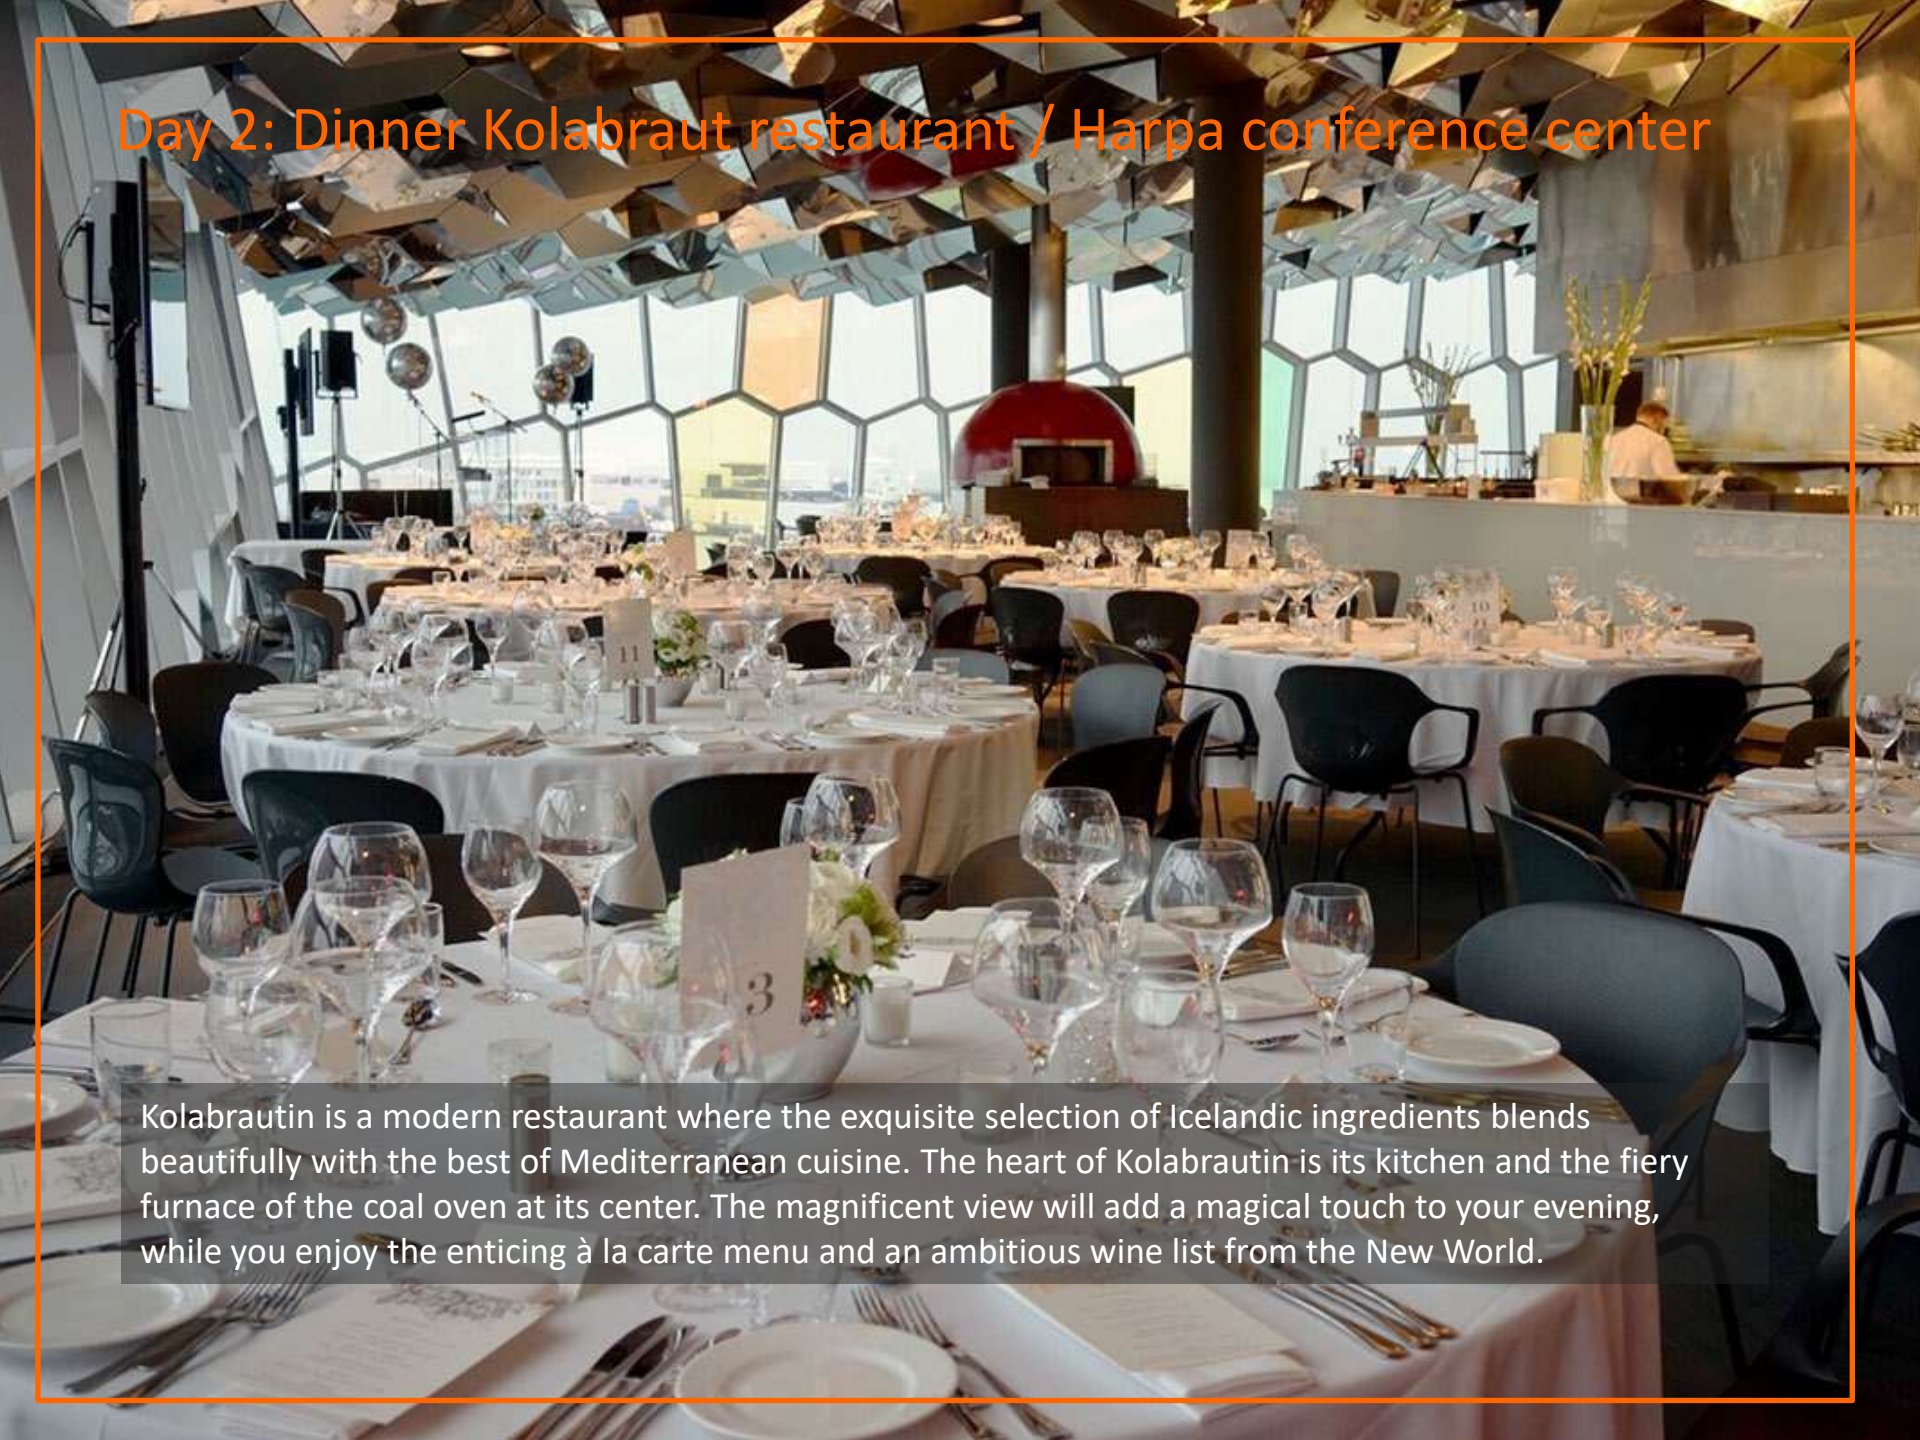

Strap into a two-seat Buggy with your partner and prepare to overcome obstacles in the rugged landscape by the slopes the valley, climbing hills, running through river beds, and more. This is an especially designed tour for you who craves bumpy, dusty, dirty driving thrills. No extra charge for dust, mud, water splashes, or even snow!

The Buggies are equipped with 4-point safety harnesses for safety, automatic transmission for driving ease. All you need is a spirit for adventure, and a valid driving license for the driver.

Day 2 : Dinner at Harpa Conference Center

Harpa is one of Reykjavik's greatest landmarks. Harpa is a cultural and social centre in the heart of the city where it poses majestically by Reykjavik harbour. Harpa is a destination for foreign and domestic travellers and an award-winning artwork that has welcomed over 3 million guests since its opening in May 4, 2011. Harpa Reykjavik Concert Hall and Conference Centre offers the best facilities for concerts and conferences in Northern Europe and has received numerous awards and prizes. Autumn 2012 Harpa received the prestigious award as the Best MICE Centre in Northern Europe.

Day 2: Dinner Kolabraud restaurant / Harpa conference center

The image shows the interior of the Kolabraud restaurant, which is located within the Harpa conference center. The room is characterized by its unique, modern design, featuring a ceiling made of large, reflective, geometric panels that create a shimmering, crystalline effect. Large windows with hexagonal frames offer a panoramic view of the city. The dining area is filled with round tables covered in white cloths, each meticulously set with white plates, silverware, and several glasses. Black chairs are arranged around the tables. In the background, a large red dome-shaped structure, likely the coal oven mentioned in the text, is visible. A chef can be seen working in the open kitchen area on the right side of the frame.

Kolabraudin is a modern restaurant where the exquisite selection of Icelandic ingredients blends beautifully with the best of Mediterranean cuisine. The heart of Kolabraudin is its kitchen and the fiery furnace of the coal oven at its center. The magnificent view will add a magical touch to your evening, while you enjoy the enticing à la carte menu and an ambitious wine list from the New World.

Day 3: Luxury Super Jeeps offroad

Nowhere but in Iceland will you find vehicles like those we use for our travels today. Crafted for uniquely tough conditions, even a term to describe them had to be invented. “Super Jeep” is the result of decades of insular technical innovation and evolution, from tinkering with old army Jeeps to get further up hill, to our hand-built monsters equally at home crossing Antarctica, the wild Icelandic Highlands – or the highway. Each vehicle is custom built with up to three separate transmissions, two separate steering systems, fully in-cab adjustable four corner air suspension, fully lockable differentials, up to 7.3 liter turbocharged engines, an array of radio equipment, marine-type satellite navigation... Oh, and the biggest available legal road tires in the world. Mercedes Bens Sprinter: *Highly capable super truck with individual seats for your comfort.*

Day 6: Thorsmork Volcano Valley adventure in Super Truck

The day starts by driving in a super jeep/SUV. **Thorsmork** is one of the shiniest pearls in the string of beautiful areas of the country, surrounded by rugged and beautiful mountains, glaciers and glacial rivers, decorated with small birch woods and silver lined with humming brooks. Many have attempted to describe the charm of this area. Icelanders appreciate Thorsmork and visit it frequently the whole year round. Quite a few brooks and rivers have to be forced to get there and no-one should attempt the trip without the company of experienced guide since the glacial rivers are very unpredictable.

Thorsmork has often been difficult to reach, except by mountain vehicles. There are a multitude of small gullies and valleys, clad with low birch-trees that create seemingly endless possibilities for the nature lover. You will find more than 170 species of plants, moss and lichen in this lush area, which was a fjord some 12,000 years ago.

The outlet **glaciers** tumble and crawl down into the gullies, some of them ending in spectacular glacial lagoons. The glacial melt-off forms rivers that have to be crossed on the way to Thorsmork. Some days the crossing is quite challenging.

An innocent stream can change in a matter of hours into a thunderous torrent. Our skilled drivers are very experienced in these driving conditions and will take you safely across any river.

DMC INCENTIVE TRAVEL

Option: Sea Fishing/Angling

We set off from Reykjavik's Old Harbour and head out to Faxaflói Bay, where our experienced fishermen will usually spot fish in a flash! If you haven't been sea fishing before, don't worry, it is very easy, and the crew will happily show you the ropes, advising you on bait and passing on their knowledge of the seas. On our sea angling trips you have a good chance of catching cod, halibut, haddock, rockfish and pollock. The sea angling tours are perfectly suited both to experienced fishermen and to those who simply wish to relax and enjoy the beautiful surrounding with a fishing rod in hand. Barbecuing the fish caught is indeed available and a popular option for the proud fishermen! Light BBQ on board catch.

Option : Snorkeling

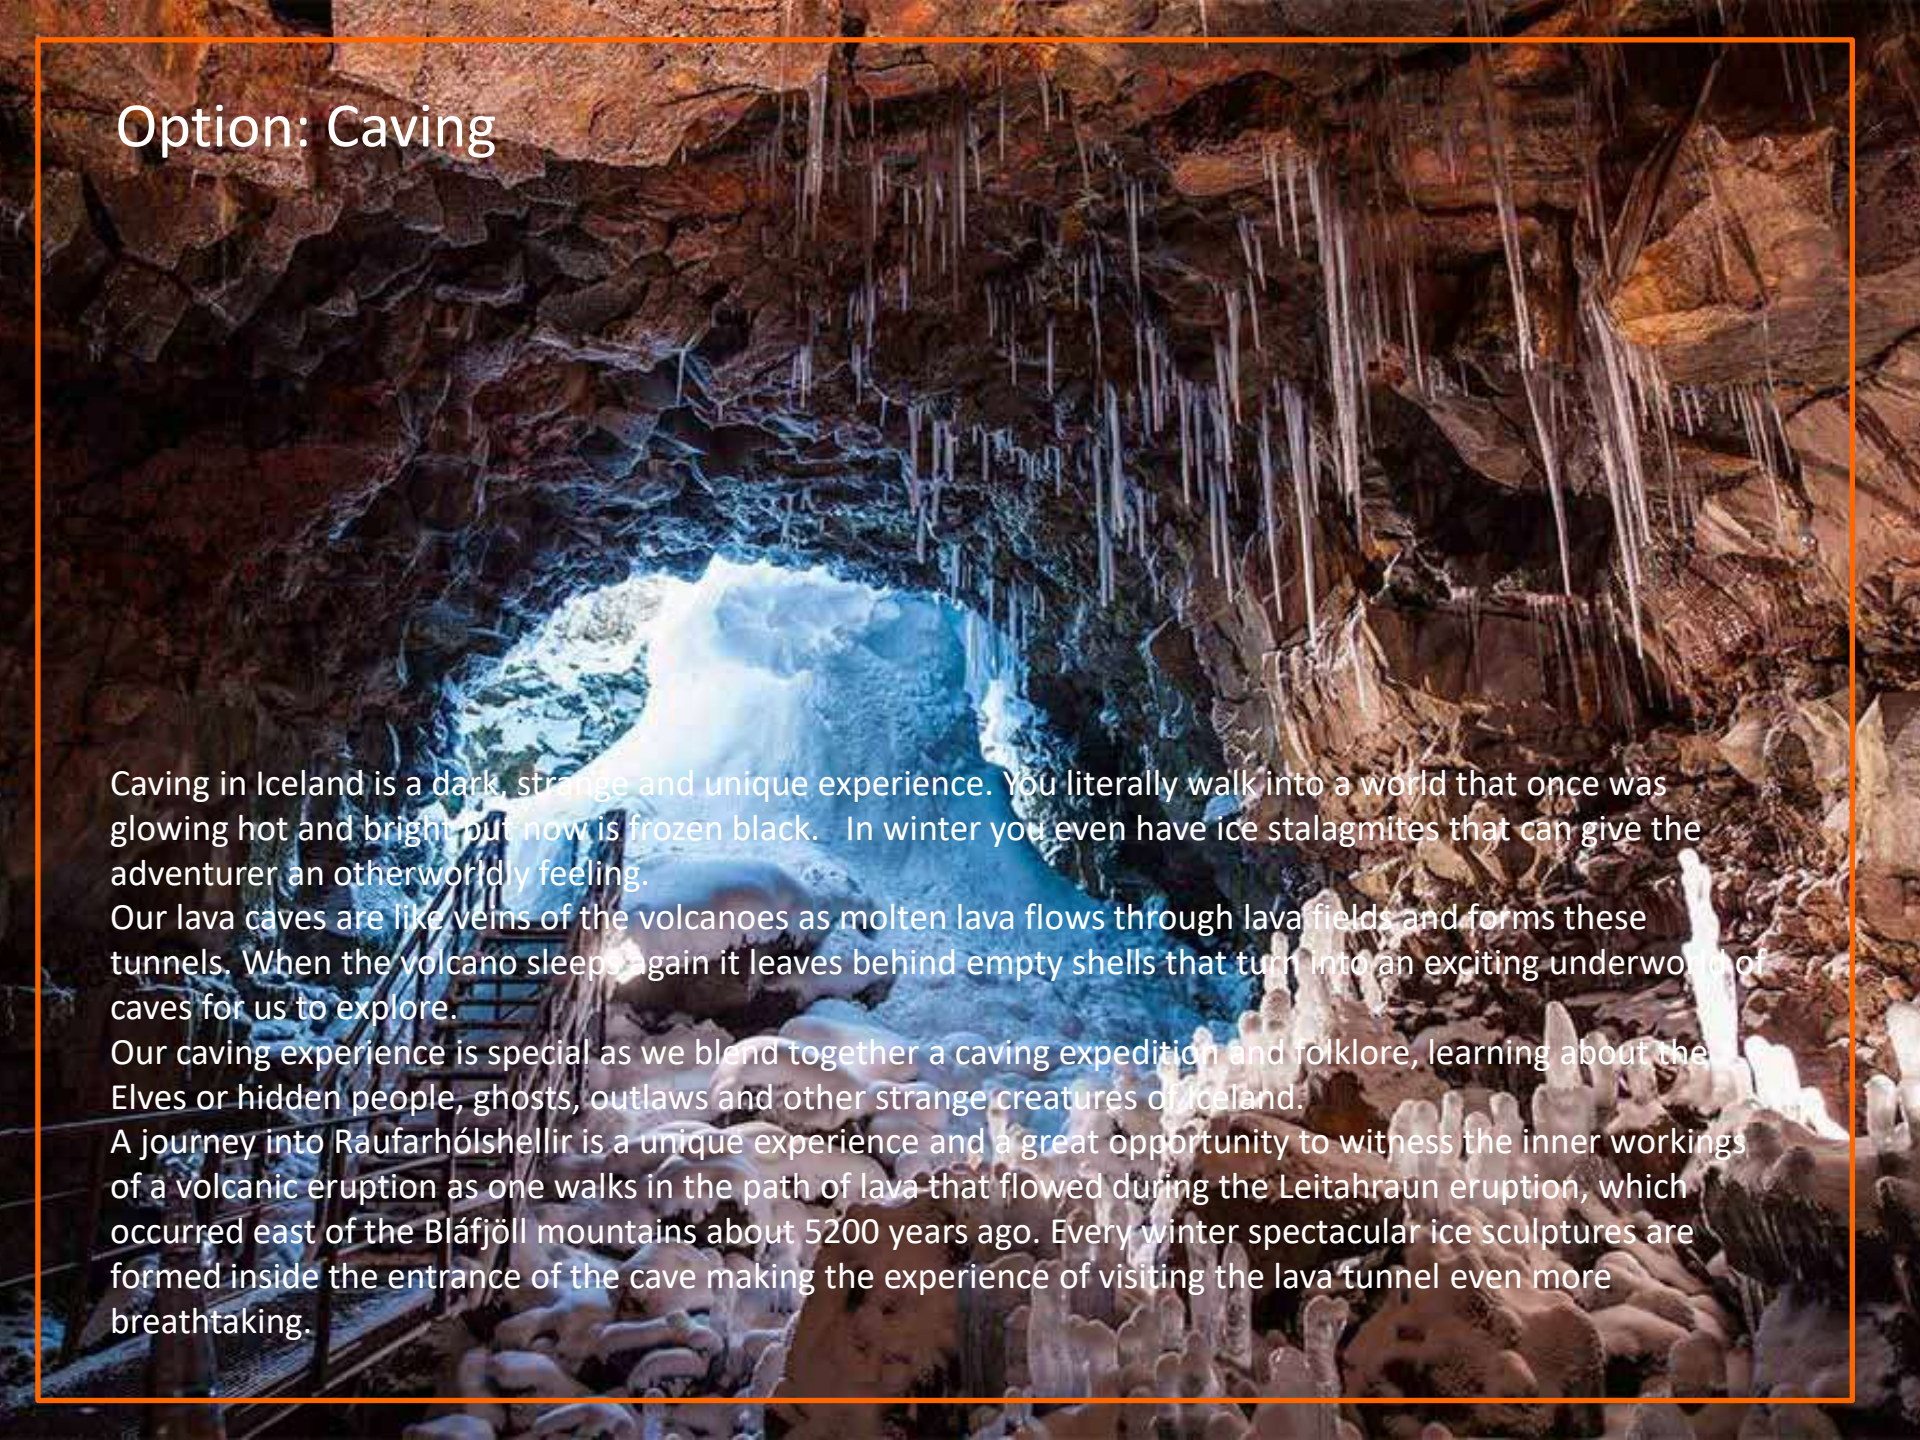

Silfra, the fissure between the continents

The Silfra fissure, is known as one of the top dive sites in the world for two main reasons. First, the Silfra fissure is actually a crack between the North American and Eurasian continents, meaning that you dive or snorkel right where the continental plates meet and drift apart about 2cm per year.

Silfra is the only place where one can dive or snorkel directly in the crack between two continental plates.

Secondly, the underwater visibility in the Silfra fissure is over 100 meters, which creates an underwater experience that will rarely, if ever, be surpassed. The reasons for this astounding water clarity are twofold: the water is cold ($2^{\circ}\text{C} - 4^{\circ}\text{C}$ year round) as it is glacial water from the nearby Langjökull and this water is filtered through porous underground lava for 30-100 years until it reaches the north end of Thingvellir lake, seeping out from underground wells. The Silfra water is as pristine as water can get and you can drink it at anytime during your dive or snorkel.

Option: Caving

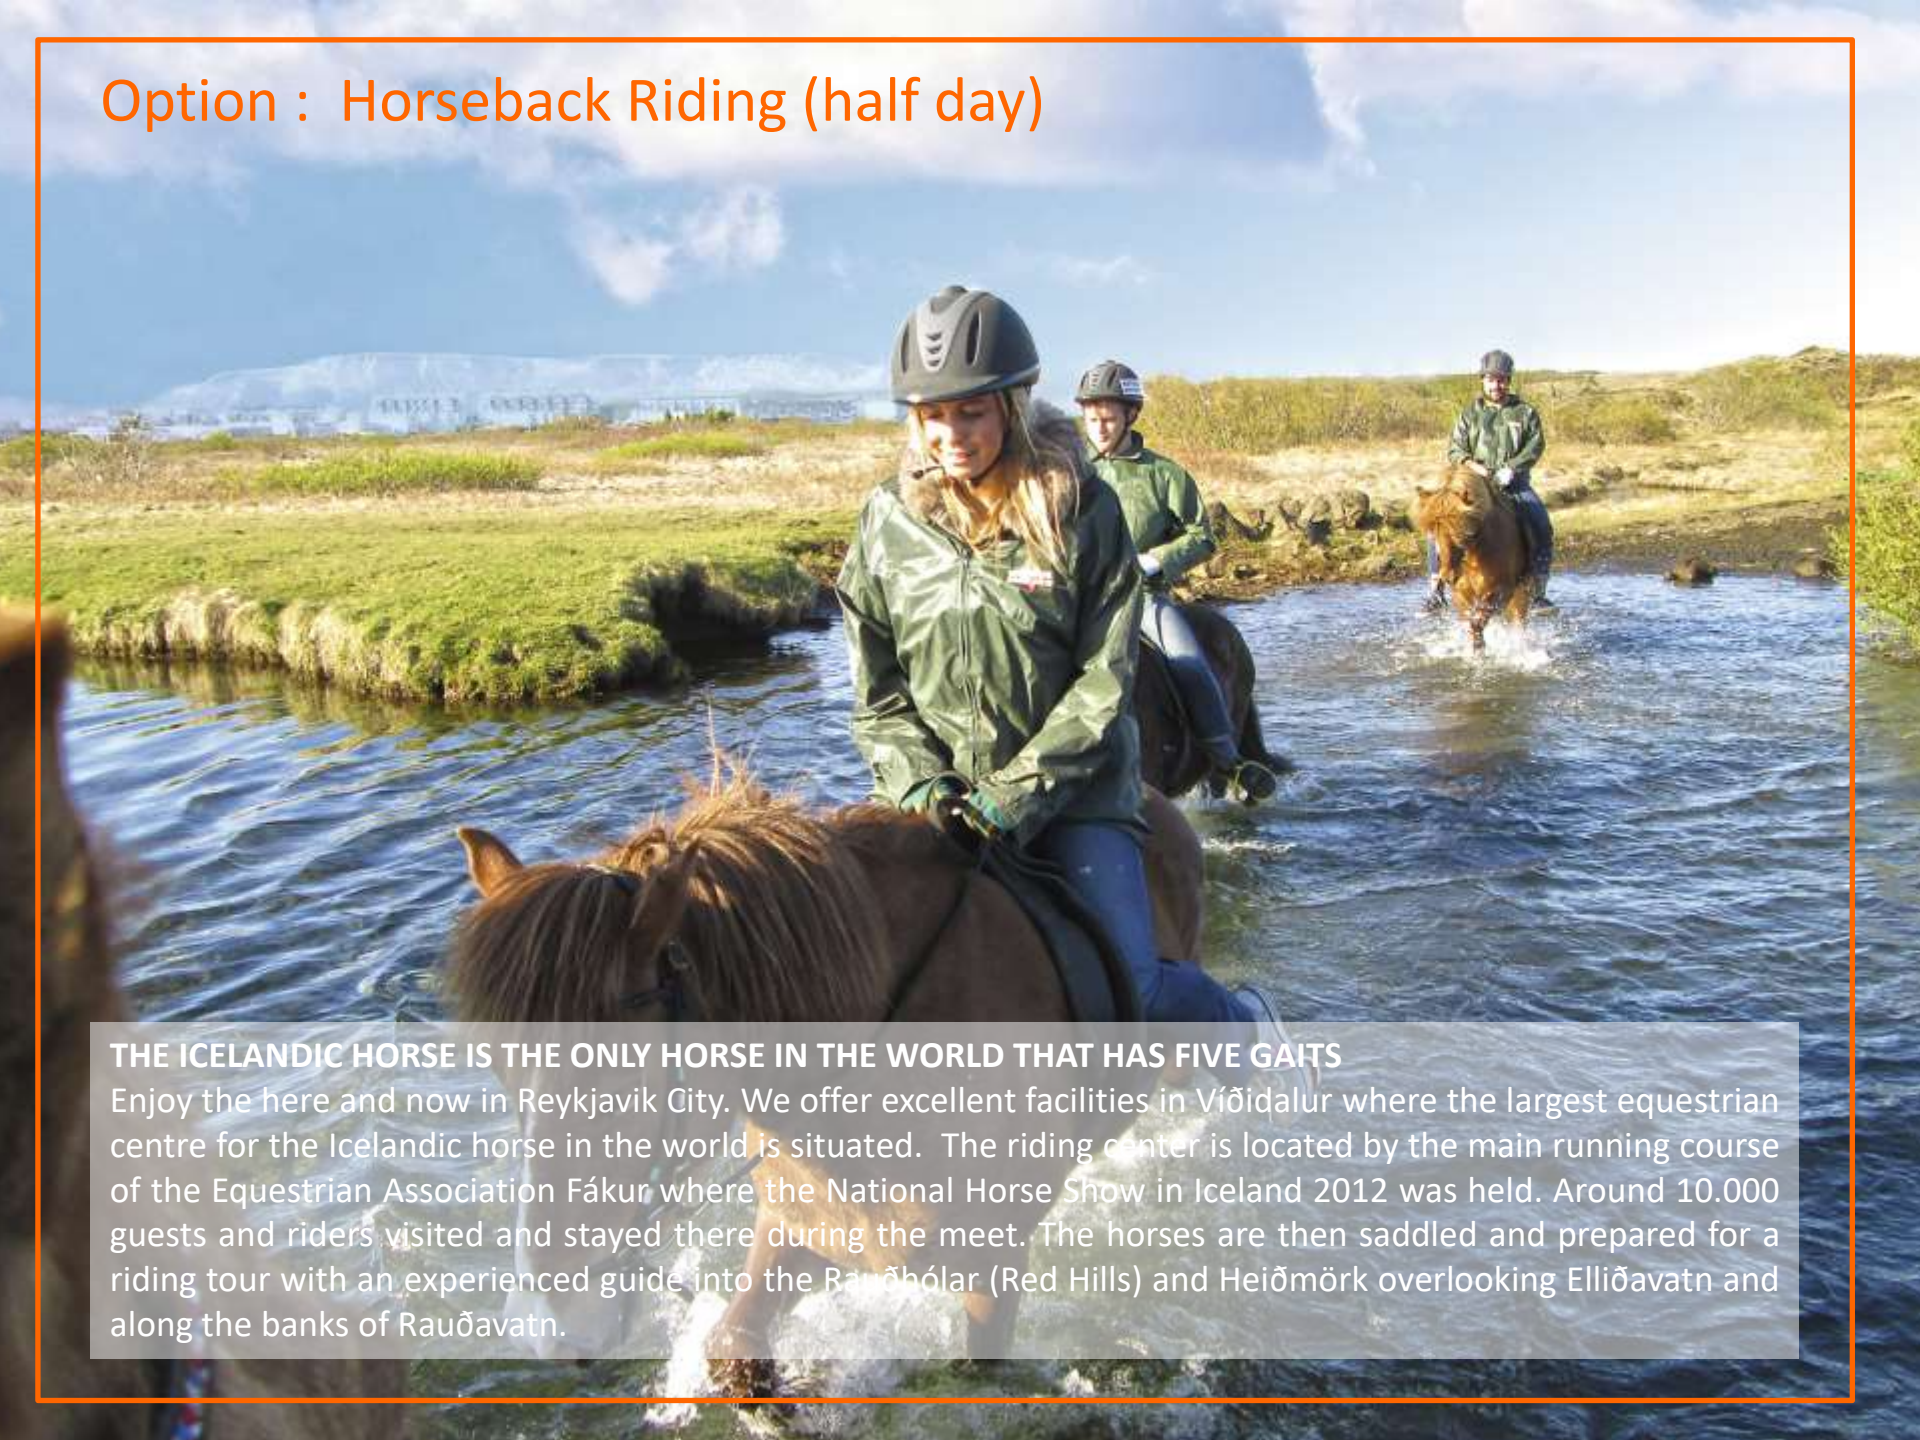

Caving in Iceland is a dark, strange and unique experience. You literally walk into a world that once was glowing hot and bright but now is frozen black. In winter you even have ice stalagmites that can give the adventurer an otherworldly feeling.

Our lava caves are like veins of the volcanoes as molten lava flows through lava fields and forms these tunnels. When the volcano sleeps again it leaves behind empty shells that turn into an exciting underworld of caves for us to explore.

Our caving experience is special as we blend together a caving expedition and folklore, learning about the Elves or hidden people, ghosts, outlaws and other strange creatures of Iceland.

A journey into Raufarhólshellir is a unique experience and a great opportunity to witness the inner workings of a volcanic eruption as one walks in the path of lava that flowed during the Leitahehraun eruption, which occurred east of the Bláfjöll mountains about 5200 years ago. Every winter spectacular ice sculptures are formed inside the entrance of the cave making the experience of visiting the lava tunnel even more breathtaking.

Option : Horseback Riding (half day)

THE ICELANDIC HORSE IS THE ONLY HORSE IN THE WORLD THAT HAS FIVE GAITS

Enjoy the here and now in Reykjavik City. We offer excellent facilities in Víðidalur where the largest equestrian centre for the Icelandic horse in the world is situated. The riding center is located by the main running course of the Equestrian Association Fákur where the National Horse Show in Iceland 2012 was held. Around 10.000 guests and riders visited and stayed there during the meet. The horses are then saddled and prepared for a riding tour with an experienced guide into the Rauðhólar (Red Hills) and Heiðmörk overlooking Elliðavatn and along the banks of Rauðavatn.

Option: Whale Watching (half day)

Your whale watching adventure begins at Reykjavik's Old Harbour, just minutes away from the city centre! You will go whale watching on the biggest whale watching boat in Iceland, Andrea. The boat offers great comfort and an interior with a large outside viewing decks. The friendly guides, along with the captain and crew, point out where to spot the whales and give interesting information about the different kinds of whales and seabirds you can expect to see. Go for a whale watching with a high cruising speed, great fun for the adventurous!

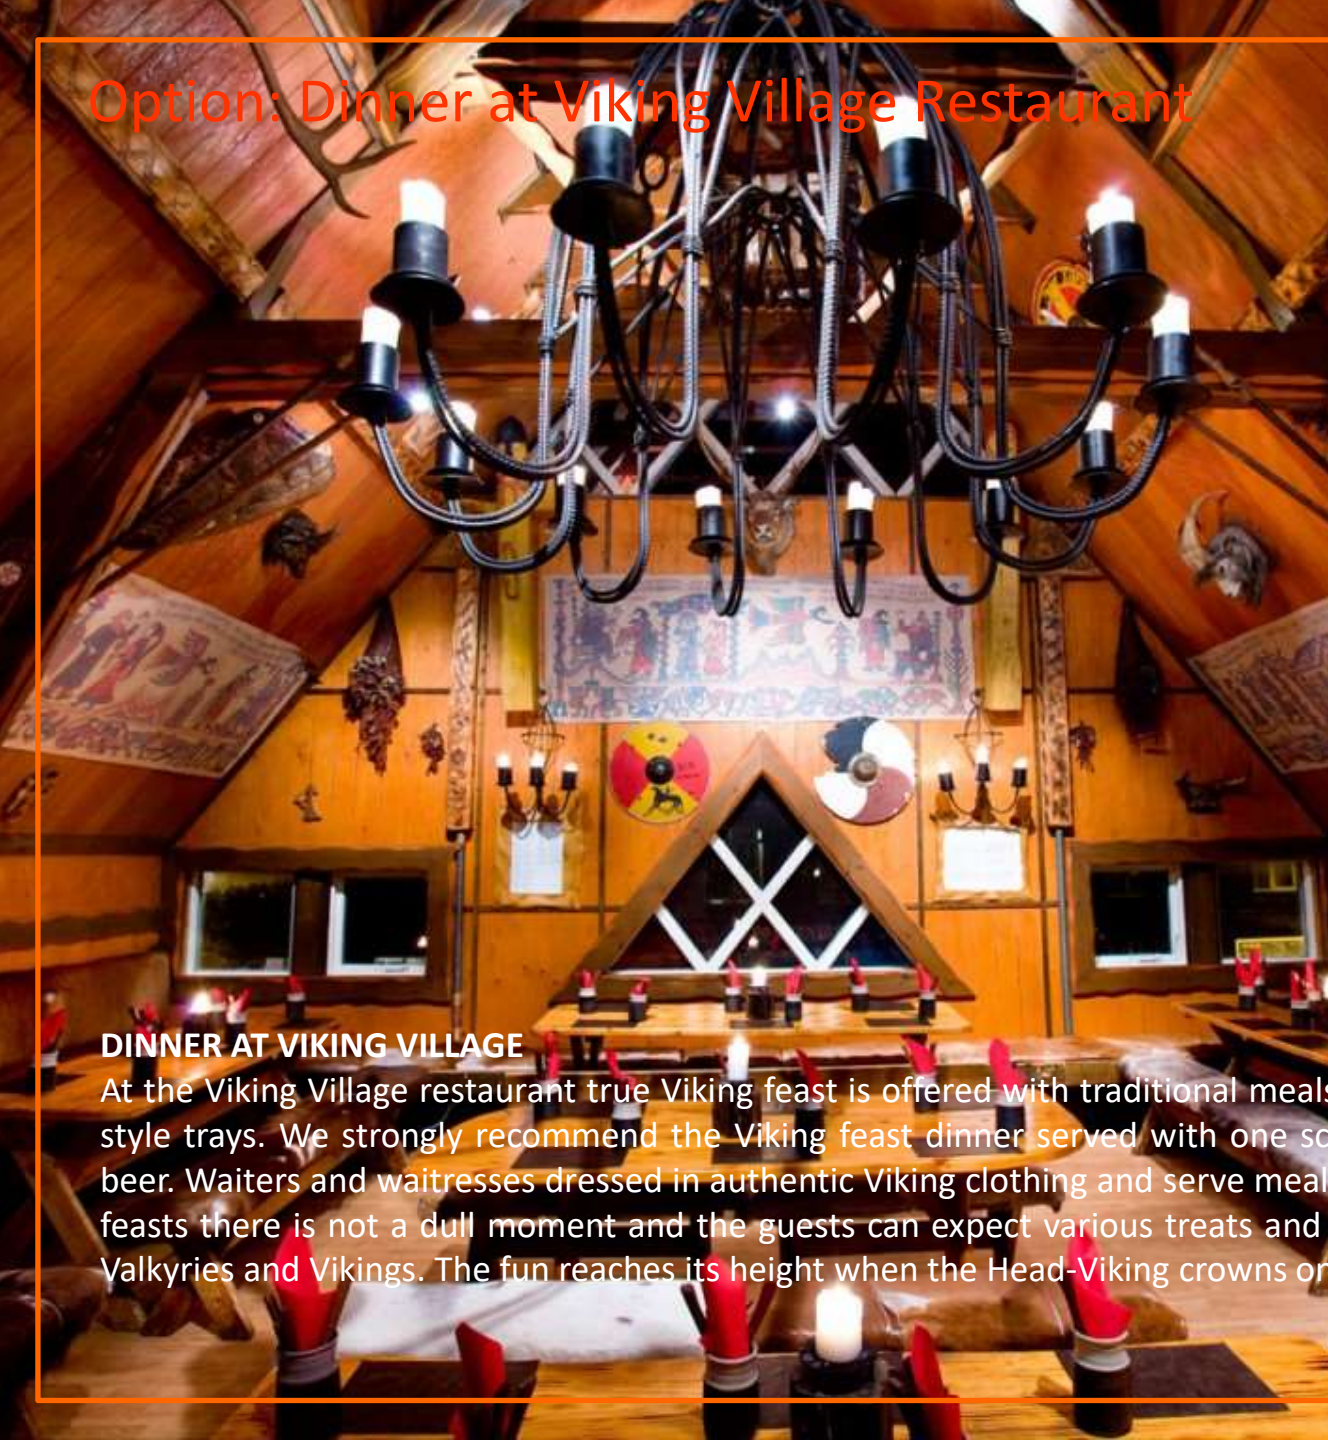

Surprise option: Taste 1000 years old Glacier

DRINK - STOP IN A BEAUTIFUL LOCATION

Drinks will be served with 1000 years old glacier ice from Europe's largest ice cap, Vatnajökull.

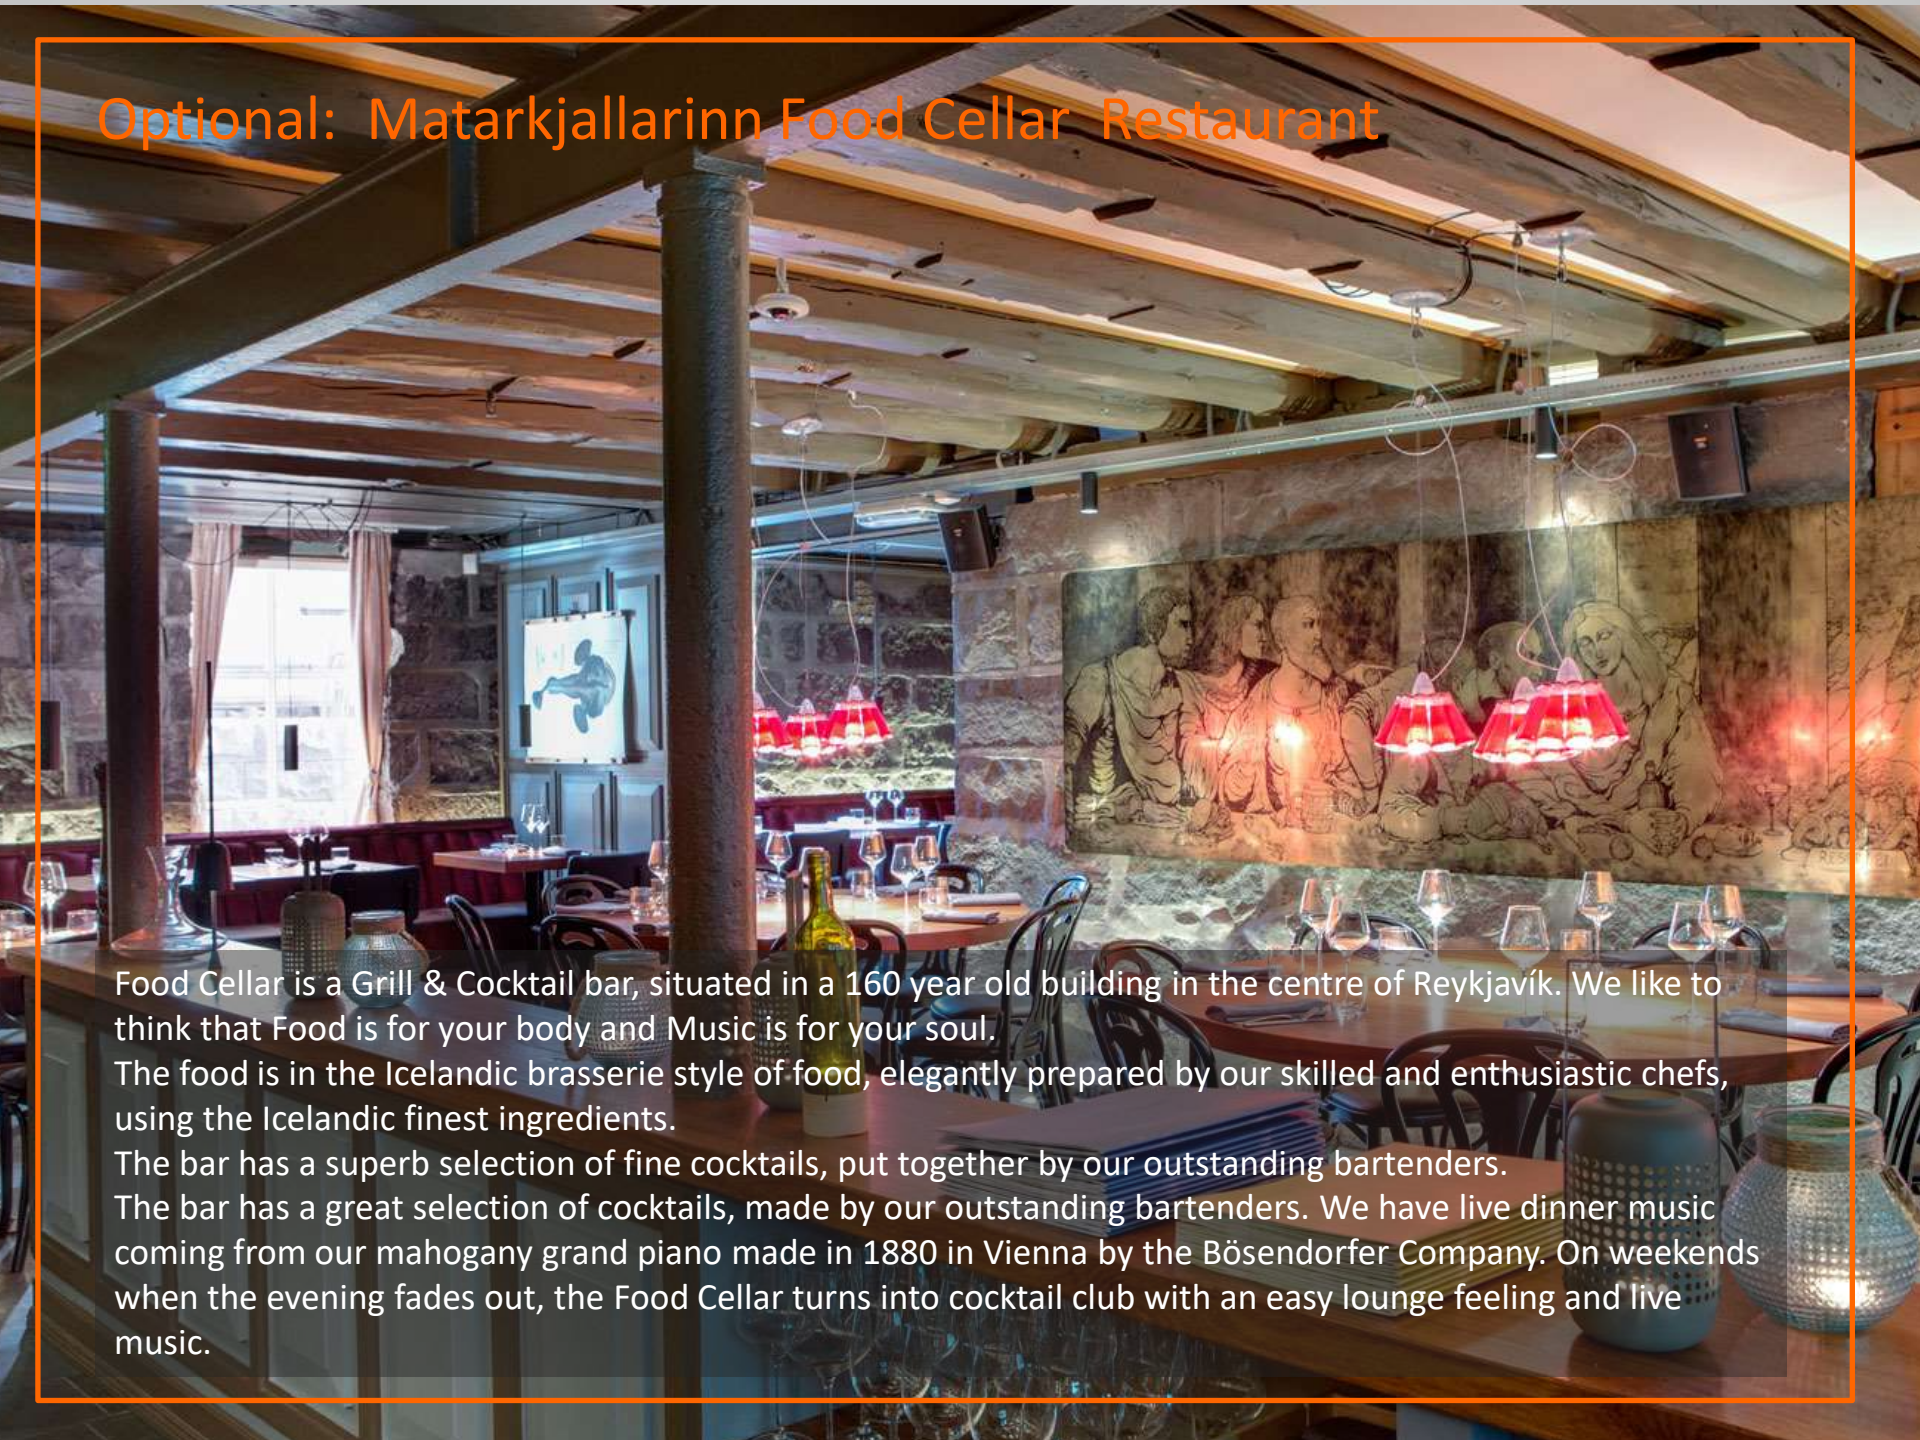

Option: Dinner at Viking Village Restaurant

DINNER AT VIKING VILLAGE

At the Viking Village restaurant true Viking feast is offered with traditional meals served in old fashioned Viking-style trays. We strongly recommend the Viking feast dinner served with one schnapps of Black Death and one beer. Waiters and waitresses dressed in authentic Viking clothing and serve meals with flair. During these famous feasts there is not a dull moment and the guests can expect various treats and surprises offered by our singing Valkyries and Vikings. The fun reaches its height when the Head-Viking crowns one guest as an Honorary Viking.

Optional: Matarkjallarinn Food Cellar Restaurant

The image shows the interior of the Matarkjallarinn Food Cellar Restaurant. The space is characterized by its rustic, industrial aesthetic, featuring exposed wooden beams on the ceiling and stone walls. A large, dark metal pillar stands prominently in the foreground. In the background, a large mural of a classical painting is displayed on the wall. The restaurant is furnished with wooden tables and chairs, and several red pendant lights hang from the ceiling, creating a warm and intimate atmosphere. A window with pink curtains is visible on the left side of the image.

Food Cellar is a Grill & Cocktail bar, situated in a 160 year old building in the centre of Reykjavík. We like to think that Food is for your body and Music is for your soul. The food is in the Icelandic brasserie style of food, elegantly prepared by our skilled and enthusiastic chefs, using the Icelandic finest ingredients. The bar has a superb selection of fine cocktails, put together by our outstanding bartenders. The bar has a great selection of cocktails, made by our outstanding bartenders. We have live dinner music coming from our mahogany grand piano made in 1880 in Vienna by the Bösendorfer Company. On weekends when the evening fades out, the Food Cellar turns into cocktail club with an easy lounge feeling and live music.

Option: Night out in Reykjavik

Reykjavik down town: B5 VIP or Austur

Austur is located in Austurstraeti, one of the main bar- and shopping streets downtown, and even though the surrounding area is filled with clubs and bars, Austur seems to be the center of attention. When you walk inside you will instantly discover why this club is so popular among locals and travelers. Inside the place looks modern, sleek and shiny, and the people who frequent Austur seem to be fashioned after the interior.

Full day optional A: Inside the Cave in Langjökull Glacier Adventours day in Super Jeeps.

This day tour gives you the opportunity to enjoy a day full of adventures, departing from Reykjavik in Super jeeps. You will get the opportunity of a life time to enjoy one of the world's greatest wilderness; Iceland's second largest glacier – even from the inside! Never before the Langjokull ice caves, has anyone been able to see the beautiful blue ice at the heart of an ice cap glacier. No doubt this will be a truly memorable day.

The drive to Langjokull glacier is very scenic and on the way we make a stop by Hraunfossar waterfalls. “Hraun” in Icelandic means lava and the lava at Hraunfossar waterfalls actually came from one of Langjokul glacier's volcanic eruptions ages ago.

Ride privately in Super Jeeps. Bear witness to global warming. Whilst there are a few man-made Ice Tunnels and Ice Caves in various places around the world, there is nothing quite like Into the glacier, either high up in a remote area of an Ice Cap Glacier, or on such a scale. Never before has anyone been able to see the beautiful blue ice at the heart of an Ice Cap Glacier; it is not quite a Jules Verne journey to the centre of the earth, or even to the absolute centre of the glacier, but it feels like an exciting and magical journey, deep within the glacier, and it is deep enough to reach another world, a world of magnificent, stunning blue ice.

Full day optional A : Super Jeeps offroad

Nowhere but in Iceland will you find vehicles like those we use for our travels today. Crafted for uniquely tough conditions, even a term to describe them had to be invented. “Super Jeep” is the result of decades of insular technical innovation and evolution, from tinkering with old army Jeeps to get further up hill, to our hand-built monsters equally at home crossing Antarctica, the wild Icelandic Highlands – or the highway. Each vehicle is custom built with up to three separate transmissions, two separate steering systems, fully in-cab adjustable four corner air suspension, fully lockable differentials, up to 7.3 liter turbocharged engines, an array of radio equipment, marine-type satellite navigation...
